Dear Members

Sub: Adjustment of Futures and Options contracts in the security Crompton Greaves Ltd. (CROMPGREAV)

In pursuance of Byelaws of NSCCL pertaining to Clearing and Settlement of deals, SEBI circular reference SMDRP/DC/CIR-8/01 dated June 21, 2001, NSE Circular no. NSCC/F&O/C&S/974 dated September 10, 2009 (download reference no CMPT/13061) and circular number 011 (download ref. no. NSE/FAOP/14192) dated February 26, 2010 members are hereby informed the procedure for adjustment of Futures and Option contracts in the underlying security Crompton Greaves Ltd. (CROMPGREAV), on account of bonus issue in the ratio of 3:4.

The 'adjustment factor' for the corporate action shall be '1.75' and the ex-date for the corporate action shall be March 08, 2010. The following action would be taken by NSCCL in this regard.

1 Action by the Clearing Corporation in respect of Futures Contracts:

All open positions in Futures contracts with the underlying security as CROMPGREAV existing after End of day on March 05, 2010 will be adjusted as under:

Positions: The adjusted positions shall be arrived at by multiplying number of contracts in the pre adjusted position by the adjusted market lot. The adjusted market lot shall be as per the circular number NSE/F&O/011/2010 dated February 26, 2010.

Futures Price: The adjusted futures price would be based on the Settlement price of the relevant futures contracts on March 05, 2010. Adjusted futures price shall be settlement price of relevant futures contracts on March 05, 2010 divided by 'adjustment factor'.

Adjusted value: In order to avoid difference arising due to rounding off of adjusted settlement price, the carry forward/adjusted value shall be computed by multiplying pre adjusted futures long/short quantity with pre adjusted settlement price. Accordingly, all positions in futures contracts with the underlying security as CROMPGREAV would be marked-to-market on March 05, 2010 based on the daily settlement price of the respective futures contract. Further, the adjusted positions would be carried forward at the adjusted value.

From March 08, 2010, daily mark to market settlement of futures contracts with the underlying security as CROMPGREAV would continue as per normal procedures.

Begin of day margins on March 08, 2010 would be computed for the futures contract with underlying as CROMPGREAV based on the adjusted carry forward value. Subsequently, intra-day margins would be computed based on the relevant traded prices at the time the intra-day span risk parameter files are generated.
